Yes, we will still move forward with the sampling as soon as the Work Plan is reviewed and approved. We will also be simultaneously designing and prepping for the installation of the groundwater recovery system air exhaust vapor treatment system.

Sincerely,

Thanks, Joe.  
 I'll pass that along to my management.  
 But you are getting the results first, right?

No, as a good neighbor we will move ahead with this action regardless of the results. Since our legal department is informing the school leadership of this action I wanted to make sure that you were aware first.

Thanks, Joe.

If you include that work in the document as a contingency measure, EPA will accept it.

For clarification, are you still thinking of basing this measure on sample results or something you plan anyway, but after receipt of the data?

Carolyn

Carolyn - one other clarification that will show up in the contingency planning section of the work plan. Amphenol has agreed to move forward with a design and installation of an "end of pipe" system to strip out any chlorinated compounds of concern as requested by the agency earlier. IWM has enlisted the aid of a third party to design a system adequate to the task. Once we have a design, we will submit it to the agency for review.

The work plan will specify this work will be done.

**Subject:** Need to change date of Amphenol Site visit

Joe and Brad,

With apologies, EPA must postpone the Site visit scheduled for August 2, 2018.

Would you be available the following week on any day Monday through Thursday?

I apologize for the inconvenience.

Thank you.

Carolyn
